LIQUIDATION IN MARKET.

New York, Feb. 10 .- Another wave of liquidation and short selling swept ever the stock market today, carrying week, when the slump of foreign exchange caused serious impairment.

Little attention was paid to free offerious of call money at 10 per cent.

The a subsequent rate of six per
cert, and the January tonnage report
of the United States Steel Corporation, confirming reports of mounting
husiness in that important industry
was altogether ignored.

In the further absence of constructive leadership it was comparatively
casy to bring about additional shrinkage of quoted values. This was especially true of stocks which are likely to be most adversely affected by
anarged readjustment of foreign trade
ponditions. arlors far below levels reached last

Shares of leading shipping com-panies again reflected this prospect to considerable extent, but heaviness, which later verged upon acute weak-ness, was shown by steels, cils, motors and specialties of all descriptions. Ralls of the highest grade also par-

Rails of the highest grade also participated in the decline, extensive offerings of those issues probably resulting in large part from the threated walkout of one of the railway brotherhoods.

According to trustworthy reports, much of today's selling bore the stamp of foreign origin, which was accepted as an afternath of the recent collapse of international credits. Offcrings were unregrained in the final fifteen minutes, when it was rumored that further curtailment of loans was under further curtailment of loans was under

way.

Net losses of 5 to almost 20 points were made by General Motors, the various mootr specialties, oils, shippings, equipments, steels, textiles and a wide

variety of miscellaneous issues, lowest prices generally at the feverish close. Sales amounted to 1,050,000 shares. Liberty bonds were heavy, but weakness prevailed in the industrial list and minor rails. Sales, par value, aggregated \$14,425,000, Old U. S. bonds were unchanged on call.

Where Vicks Began

The Drug Store in which O. Henry Spent His Boyhood

This is the drug store in Greensboro, N. C., purchased by Mr. Lunsford Richardson in 1888 from Dr. Porter. Dr. Porter was the uncle of "Will" Porter, who, under the nom-de-plume of O. Henry, became America's greatest short story writer. O. Henry practically grew up in this store and learned here the profession of pharmacy.

It was during his years behind the prescription counter of this drug store that Mr Richardson worked out the formula for Vieka.

Directions for the Use of Vicks

Vick'S VapoRub comes in salve form. When applied to the body its action is two-fold.

1st.-INTERNAL. The heat of the body releases the ingredients in the form of vapors. These vapors are inhaled with each breath, carrying the medication through the air passages to the lungs.

2nd.-EXTERNAL. In addition, Vicks is absorbed thru and stimulates the skin, attracting the blood to the surface and aiding the vapors inhaled to relieve the congestion.

For Deep Chest Colds, Sore Throat, Bronchitis, Coughs, Hoarseness

For severe cases, hot, wet towels should be applied over the throat and chest to open the pores of the skin. Then Vicks should be rubbed well in, spread on thickly and covered with two thicknesses of hot, flannel cloths. The clothing should be left loose around the neck and the bed clothes arranged in the form of a funnel, so that the vapors

For Head Colds, Asthma, Catarrh, Hay Fever, Whooping Cough

spoon and the vapors inhale or a little applied up the nostr' ; and snuffed back into the air pussages.

For Spasmodic Croup and Children's Colds

Vicks is particularly recommended for children's colds, since it is externally applied and can, therefore, be used often and freely with perfect safety. For spasmodic croup, rub Vicks over the throat and chest until the difficult breathing is relieved; then spread on thickly and cover with a hot flannel cloth. An application at bedtime usually prevents a night attack of

For Use as a Liniment. Poultice or Plaster

On account of its penetrative and rubefacient effect on the skin, Vicks has been found excellent for many minor ailments, such as Bites, Boils, Burns, Bruises, Cuts, Frost bite, Itchings, Muscular Soreness, Poison oak, Sun-

How the Use of this External Treatment for Cold Troubles Has Grown

ORE than a score of years ago, Lunsford Richardson, a druggist in a little North Carolina town, was trying to find a new way to treat spasmodic croup and colds. He had been trying to find it for years -he needed such a treatment in his own home -he knew that epicac and internal medicines disturbed the delicate digestions of childrenthat the only way to get medication directly to the air passages and lungs was in vapor form. So he was searching for an effective vapor treatment which would be economical, convenient, and which could be used without the necessity of closing up the sick room and thus excluding the fresh air. so important in the treatment of colds.

At last, this druggist found a process by which he could combine in salve form the standard, time-tested remedies - Camphor, Menthol, Eucalyptus, Thymol and Turpentine -with other volatile oils so that when this salve was spread over the throat and chest the ingredients would be vaporized by the body heat. These vapors, inhaled with each breath all night long, carried the medication directly to the parts affected and at the same time the

Vicks is simply an

emergency remedy,

salve was apsorbed thru and stimulated the skin, aiding the vapors inhaled to relieve the congestion. This product was named Vick's VapoRub.

Now over 17 Million Jars are used yearly

Vicks was found to be good for a great many troubles besides spasmodic croup, and as time went on, its sale increased county by county and state by state, until now over 17 million jars are used each year - almost one jar for every family in the United States. And this in spite of the fact that Vicks is still a new form of treatment to many people in the North and far West.

The best testimony to the value of Vicks is the increasing number of families who, each year, are converted to the use of this real "Little Bodyguard in the Home."

Here is the record of the number of jars used annually for the last 'ew years:
